

Backyard
VACATION OASIS
CREATING ONE VACATION AT A TIME

WHY CHOOSE BACKYARD VACATION OASIS?

We understand that purchasing a pool and finding the right pool contractor is a big decision. This is why we would like to assure you that, as a family-owned business, Backyard Vacation Oasis has the experience and business acumen to see your pool project professionally through to completion.

With over 30 years of experience in the pool industry and 40 years in carpentry, Howard Guidry started his own pool business in Louisiana before making the Texas hill country his home in 2006. He set out to make the pool building process a breeze for customers. This is where Backyard Vacation Oasis was born. His expertise in construction and the pool industry helped him to build a business centered around the customer.

He has a passion for family, so he brought them into the process for a true family business. His wife, Kelli Guidry, has years of marketing and sales experience to ensure things run smoothly behind the scenes. His kids having been in the pool industry from a young age coupled with other skills have helped grow the business. Jade Guidry, with a background in aviation mechanics, is the project manager. He oversees the project in your yard throughout the process. Alex Guidry Rodriguez, with a background in business management, operates as office manager. She gets the day to day going and makes sure it keeps momentum.

We hope to help you through the pool building process and for you to become part of the Backyard Vacation Oasis Family!

Kind Regards,

The Guidry Family

Outdoor Living

OUR EQUIPMENT

The equipment we use on our pools is the most innovative and energy-efficient on the market today. This ensures that you get a reliable, hassle-free pool experience that also enables you to save money on the operation of your pool.

JANDY VERSA PLUMB® SYSTEM

Equipment that works together to save you more!
The Versa Plumb System delivers the highest energy efficiency.

50% More Hydraulic Efficiency*

Reduces hydraulic resistance by up to 50% versus other equipment sets in its class.

Uses Less Horsepower

Increased hydraulic efficiency allows for up to a 1/2 HP smaller pump to achieve the same level of flow, resulting in greater energy savings.

50% Less Plumbing Pipe

Innovative system design requires 50% less plumbing pipe and fittings, while increasing hydraulic efficiency.

*Comparison is between Jandy Versa Plumb System using a Jandy Pump, Versa Plumb Filter, LXi™ Heater, AquaPure® Salt System, and NeverLube® Valves with sweep elbows versus competitors' equipment using comparable pump, filter, heater, sanitizer and valves.

iQPUMP01 INSTANT PUMP AUTOMATION

App control for Jandy Variable-Speed Pumps

Jandy variable-speed pumps feature an auxiliary relay which, when combined with iQPUMP01, enables instant automation for your pump — plus one additional piece of equipment — using the iAquaLink® app. Available on all 2.2 and 2.7 HP Jandy variable-speed pumps, it eliminates the need for an additional timeclock to control equipment such as a booster pump or salt chlorinator.

VSPHP- PLUSHP VARIABLE SPEED PUMP

Designed to save energy and space, the FloPro 2.7HP variable-speed pump now provides even greater performance and efficiency while noticeably reducing noise. With a 20% improvement in hydraulic performance from the previous generation*, and dual voltage capabilities as well as two auxiliary relay connections, our smallest pump accommodates large pools and spas with multiple features.

*Hydraulic Horsepower of VSFHP270DV2A model compared to VSFHP270AUT / VSFHP270JEP models as measured on system curve C at 3450 RPM.

CV SERIES CARTRIDGE FILTER

The CV Series Cartridge Filter is designed to take advantage of the filter's total surface area, providing clear, clean water and extended cleaning cycles. The new CV filter is engineered to work more efficiently with other Jandy products when used in the Versa Plumb® System.

JANDY JE HEAT PUMP

High Performance, Energy-Efficient Pool/Spa Heating

The Jandy JE Series line of premium Heat Pumps delivers maximum energy efficiency and reliability. Working efficiently, JE Heat Pumps absorb free heat from the air and transfer it to the water, making the heating process ecological and cost effective.
